

# Test Spectra of NucScout\* with 2"x2" NaI Detector

\*) The NaI gamma detection module can be used in all DACM based instruments

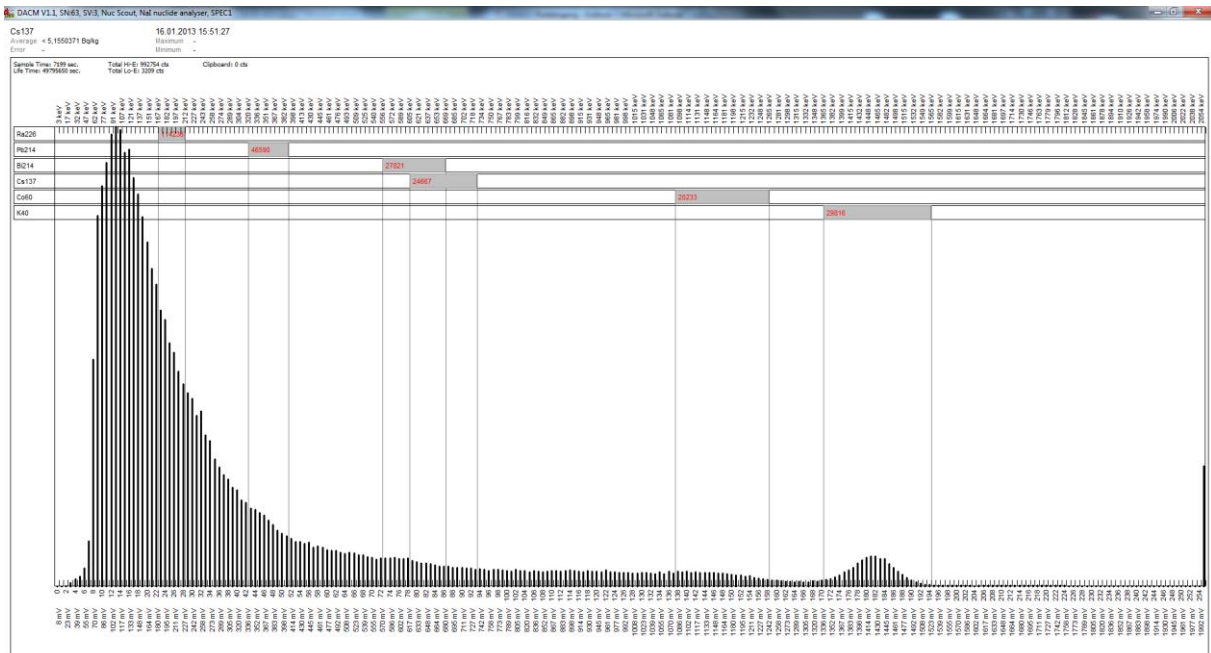

Cs-137 (10kBq point source directly in front of the detector)

Ra-226 decay chain

# K-40 with natural background

Pictures show screenshots of the spectra view of dVISION. The marked areas are related to the six analysed nuclides chosen with dLIBRARY.
